Facade Tectonics Forum: NYC

Outside the Lines: Building Facades Redefine Urban Living in NYC

Hosted by the Ornamental Metal Institute of New York

Friday, October 27, 2017 | 1:30 – 7:00pm

The Times Center

242 West 41st Street (41st Street at 8th Avenue)

The **Facade Tectonics Forum: NYC** will include a Friday afternoon speaker program with panel discussions, followed by a cocktail reception. The three scheduled sessions:

- **SESSION 1** the Inside: the Facade Effect on health, productivity, and lifestyle
- **SESSION 2** the Outside: the Facade Effect on urban habitat
- **SESSION 3** the Far Side: Scaling Success – the New York Times Building revisited

Art, Science and Technology of the Building Skin

The Facade Tectonics Forum features a curated speaker program that includes diverse voices from the world of advanced building facade technology, showcasing new perspectives on the opportunities for innovation in the design and delivery of the building skin. Multiple emergent drivers are forcing a step change in the performance demands on buildings, and most particularly on the facade system. These demands mandate an innovative response to issues ranging from systems and materials to design and delivery strategies.

Facade Tectonics outreach programs are prime informational resource and networking events for architects, general contractors, engineers, fabricators, material suppliers, building owners and developers, educators, and students. The NYC forum will be held at The Times Center at 242 West 41st St in Midtown Manhattan. The program will include leading facade practitioners, projects, and relevant issues from the area. Students and Institute members qualify for discounted registration fees.

Professional registration – \$145 / \$130 for FTI Members

Student registration – \$45 / \$15 for FTI Members

Industry professionals will earn 3 AIA CES LU/HSW credits!
